There are not enough words to express the Township's gratitude for the thoughtfulness and generosity of Karen Anderson. Karen is a family friend of life-long resident Marie Struss and Marie's son Steve.

Karen has a business specializing in audiology and noticed when she attended some of the Board meetings that the Township needed an amplifier set up.

Karen has "gifted" an amplifier set up to the Township. Thanks to Karen everyone attending the meetings will be able to hear and the Township will be ADA (Americans with Disability) compliant. **THANK YOU SO MUCH!!**

Annual Picnic

If you want to hear some Township history then plan to attend the "Annual Picnic" on Tuesday, July 4, 2017 at the historic Waterford Town Hall starting at 11:30 a.m. with the "dinner bell" ringing at noon – eating inside the Town Hall rain or shine.

Last year's theme at the Annual Picnic was "A John Dudley Memory". This year's theme will be sharing your "Favorite Township Memory".

Bring friends & family, utensils, plates & a dish (hot dishes in crockpots-no stove or refrigerator available) to pass. Beverage, cups & napkins will be furnished by the Board.

Thanks Burnsville

The right to an anonymous vote is a cornerstone of the U.S. democratic process. According to Dakota County's Election Guide for Election Judges, "precincts must ensure privacy for all voters when they are marking and casting their ballot".

The City of Burnsville decided to retire their decades old portable privacy voting booths. The folding legs were wobbly & some of the light assemblies were not working, but with a little ingenuity, a clever fix was designed by Election Judge Steve Wheeler to extend the voting booth's useful life for \$1.05 per voting booth.

Fifty Waterford residents used the voting booths during the Annual Township Election on March 14, 2017 for the first time. Voters noticed and voters appreciated!

Burnsville's vintage voting booths are now Waterford's voting booths for decades to come. Thank you, Burnsville.

Waterford Township Newsletter - June 2017

The Township has two structures on the National Register of Historic Places: the Waterford Bridge and the Township Hall.

This Newsletter contains a "Bridge Report" and the December Newsletter will contain a "Township Hall" report. Why are these articles necessary and why now?

Both structures have been on "deferred or minimal maintenance" for many years. Both structures are continuing to deteriorate and need significant repairs.

CHALLENGES AHEAD

- Management Plan for each structure – stabilization, preservation, maintenance
- Cost Benefit Analysis for each structure
- Capital Project Fund for each structure
- Volunteers needed for researching, project planning, cost analysis, project management, strategic planning, fund raising, lobbying, grant writing, etc.
- Community engagement and feedback

Bridge Report

This report will be an attempt to briefly summarize the Bridge's history and the Bridge's current status.

Pictured above is the Waterford Township Bridge built in 1909. The one lane bridge consists of a 140 foot, steel, riveted and bolted Camelback through truss on concrete abutments. The Bridge is one of the earliest extant bridges in Minnesota.

In the early 1980's the bridge was threatened by erosion on the south west abutment requiring \$40,000 in repairs.

In 2009 the bridge was sufficiently deteriorated that it was closed to vehicular traffic and the road rerouted over a new bridge christened the "Dudley Bridge."

In June 2009, the bridge was placed on the National Register of Historic Places by the Town Board.

In late 2013, the Minnesota Department of Transportation (MnDOT) inspected the Waterford Bridge and issued a Local Historic Bridge Report (L3275) that consists of pictures, conditions and projected costs approaching \$750,000 to historically restore the Bridge.

Take time to read the report on line or request a copy from Clerk, as it is impossible to summarize in this newsletter:

www.dot.state.mn.us/historicbridges/bridge/L3275/bridge-report.pdf

In 2014, due to erosion the southeast abutment was rebuilt with a grant sponsored by American Express & the National Trust for Historic Preservation. The grant provided \$95,000 and the Township borrowed \$60,000 or \$7,330 annually for 10 years. Total cost of repair \$168,300.

On May 8th, 2017, the Town Board had a 35-minute meeting at the Bridge because of reported "decking deterioration" causing a safety concern. Sadly observed:

- North West Bridge Abutment Spalled – cracked - missing concrete – trees in cracks
- Corrugated Metal Semi-Cylindrical Sections – Missing - multiple locations – see picture below
- Channel Stringer - South side of bridge Corroded/Rusted Through – see picture below
- Deck (poured concrete covered with asphalt) Asphalt & concrete missing – leaving gaps to river
- Rusting of steel frame - paint flaking – paint missing
- Graffiti, garbage, bullet holes, weeds, brush, trees

Corrugated metal semi-cylindrical sections are gone leaving cracked, missing & broken concrete all along underside of bridge deck:

South channel stringer – highly corroded/rusted through

More pictures of other damage/deterioration available, but due to space not included in Newsletter. Request pictures from Clerk or I encourage you to visit the Bridge yourself.

Waterford Township Newsletter - June 2017

On **June 1, 2017**, ten (10) people from MN Dept. of Transportation, Dakota County, DNR, Mill Towns Trail & Carleton College met with the Board at the Bridge.

Discussion Items

- Condition score (**low/poor**) – score determines financial prudence of rehab or preservation
- Placed on the National Register **2009** - no management plan, bridge continues to deteriorate.
- Funding sources – Less funding is available for non-vehicular historic bridge restoration.
- **2013** restoration estimate - \$500,000-\$750,000. Anticipate actual costs greater due to time, inflation, lack of maintenance, continual deterioration, etc.
- Liability & Safety – No access to bridge till restored.
- Mill Towns Trail – several years out – unknown
- **2014** Taxpayers levied for \$60,000-Township's share of abutment repair–7 years remaining–tax burden
- Restoration or demolition or re-location? Restoration would require Township to budget for maintenance.

Outcome of the Meeting

- MN DOT, Dakota County, DNR, Mill Towns Trail offered support/commitment for planning, grant writing, maintenance & restoration, etc.
- Dakota County has plans to eventually hook on to the Mill Towns Trail system
- Apply for MN Historical & Cultural Heritage Grant for engineering assessment/study. Due by July 21st.
- Purpose of Engineering study – determine course of action–restoration or demolition or relocation
- Dakota County offered grant writing services to Waterford as part of their active living/trail projects.

New Board Chair

In 2016, the Township Board of Supervisors “wisely” passed a resolution requiring annual rotation of Chairperson. Purpose of the rotation is to share the additional work load among Supervisors.

Effective April 10, 2017, Supervisor Frank Wergin assumed the Chairperson responsibilities from Chairperson Messner. Responsibilities include: Chair meetings, provide leadership, Board liaison to the Clerk, etc.

The “rotation” will not change the Township Supervisors availability nor their response to the residents. All your elected Supervisors are available via e-mail or phone.

Please note the Chairperson does not have any more decision making authority than any other Supervisor. Township decisions are made by a vote of the three Supervisors during scheduled meetings.

SEPTIC SYSTEM COMPLIANCE

The Minnesota Pollution Control Agency (MPCA) regulates onsite sewage treatment systems via Chapter 7080 of the Statewide code. In September 2016, the MPCA audited the Township's septic system permitting, inspection, recordkeeping and enforcement activities.

The Township learned that Septic System regulations require dedicated staffing, funding, recordkeeping and enforcement that the Township is not doing to the degree necessary to comply with regulations. For instance, half the septic systems in the Township have not been pumped on a three-year cycle as required by the MPCA. The Township, by regulation, is required to enforce septic system pumping through education, notification & court action if the resident does not comply.

Since the September MPCA audit, the Board Members have talked with other governmental units, the MPCA and Dakota County about the regulations and what it takes to be compliant. The Township Board, just as other small governmental units, has concluded that it is not practical for the Township to internally manage the Septic System Compliance program. On May 24, 2017, the Township Board met with the MPCA and Dakota County staff to begin the program transition.

The good news is that Dakota County already has the trained staff, technology, sheriff, attorney and the funding to seamlessly incorporate Waterford Township into the county wide septic system compliance program.

For questions regarding how this might impact your septic system, please contact the Dakota County Environmental Resources Dept. at 952-891-7008.

A Word from The Clerk.....

Clerk prepares Regular Meeting agendas. Posted on Town Hall door & on website on Friday before Monday meeting.

- Communicates topics for discussion & action
- Helps prevents meetings from drifting off topic
- Ensures all items are addressed & documented
- Helps research & gather documents for meeting
- Meetings are more efficient/productive/respectful

Please call or e-mail the Clerk at least **FIVE** days prior to a Regular Township Board meeting to ensure your “item” is on the agenda. Items not on the agenda may be deferred to the next regularly scheduled meeting.

Waterford Township Newsletter - June 2017

DesiComments.com

The Waterford Township Board wishes to thank the following individuals for their individual contributions to “grassroots” government –

CHAIRPERSON: Liz Messner, is taking a two-year break from the responsibilities of “Chairperson” but not Township Supervisor. Messner took on the role of Chairperson when Chairperson John Dudley stepped down from the responsibilities of Chairperson after 45+ years due to health concerns in late 2015.

Messner, as chairperson, supported implementation of a budget committee, a road committee, meeting protocols, agendas, notice protocols, ordinance changes, adoption of Building Code, fee schedules, records retention, Chairperson rotation, website, compensation policy, septic system compliance, Town Hall rental agreement, shared well policy, Town Hall cleanup, quote form, etc.

Messner stated - “I plan to focus my attention on grant writing, comprehensive plan review and retaining annexation control in the next two years.”

Liz, the Township thanks you for your leadership!

COMMISSIONER: Tom Davis resigned from the Planning Commission on May 3, 2017 because his job responsibilities would have made it difficult for him to attend evening meetings. Davis commented -” I volunteered to serve on the Commission because I cared about local land use and the zoning ordinances of the Township”. The Township appreciates your ten years of dedication and service. Thank you,

DEPUTY TREASURER: Jeanette Bakken served as Deputy Treasurer to Treasurer Larry Odegard for over seven years until Larry was elected Supervisor in 2016. Rules require that when the Treasurer vacates the Treasurer position the Deputy Treasurer also vacates the Deputy position. A belated thank you from the Township.

ELECTION JUDGES: Linda Blankenberger, Lorraine Lemke, Reinhold Lemke, Inez Malecha, Jan Odegard, Larry Odegard, Bridget Renland, Marie Struss, Steve Wheeler, Paul Wrolstad are owed a debt of gratitude by every voter in the Township – without them we could not exercise our constitutional right to vote. As Clerk, I am also grateful when they answer the call to serve as an Election Judge!

SPECIALIST: Supervisor Larry Odegard designed, constructed and installed a “wooden” address sign for the Township Hall. Now emergency personnel can find the Township Hall location in case of fire, illness or injury. Haven’t seen it??? Drive by and check it out!!!

We appreciate Larry’s willingness to volunteered his time, talent & supplies. The sign does the job – Thank you!!!!

In Good Hands

The financial records of the Township are in “good hands” with elected Treasurer Charlene Klemenhagen and Deputy Treasurer Jane Dilley.

On February 13, 2017, Township Treasurer Klemenhagen acting under Minn. Stat. § 367.161 appointed Jane Dilley as the Deputy Treasurer of Waterford Township. Dilley will be expected to perform the duties of Treasurer when Klemenhagen is absent.

Ms. Dilley grew up in Waterford and Greenvale Townships. She owns and currently farms land that has been in the Dilley family for generations. Ms. Dilley retired from Anchor Bank as Senior Vice President of a Trust department four years ago.

Treasurer & Deputy Treasurer’s recent activities:

- Training - City & Township Accounting System (CTAS) Advanced training scheduled this summer.
- Successfully completed CTAS audit back to 2013
- Download recent version of software from State Auditor
- Manage accounts payable & accounts receivable
- Develop financial reports for budget & claim reports
- Monthly reconciliation of checking account to CTAS
- Audit vendor invoices before recommending payment
- Prepare & submit mandatory financial reports to State
- Budget Committee Meetings – goals “financial health”, next year’s budget, 5-year budget, tax levy.

COMPREHENSIVE PLAN REVIEW

The Planning Commission is working with Dean Johnson, Township Planning Consultant and the Dakota County Township Officers Association to update the Township’s Comprehensive Plan as mandated by State Statute 473.858 every ten years.

Local plans (preserving rural agricultural zoning) must align with the Metropolitan Council’s regional system plans related to highways, transit, airports, wastewater services, parks and open space.

A Public Hearing will be scheduled for Township input & feedback later in 2017 or early 2018. Watch the website & the Northfield News for a Public Hearing Notice.

Waterford Township Newsletter - June 2017

BUDGET & LEVY FOR THE FUTURE

Currently the Township operates without a Capital Projects Fund (construction or improvement of fixed assets) or major project Road & Bridge Fund (Dresden asphalt or Barnard wingwalls replacement) or a Reserve Fund (stabilizing a Township against cyclical changes in revenues and expenditures).

Many years ago, according to a previous Township Board Supervisor, “if a Township had any reserves, project funds or savings it worked against them in the State Aid formula”. State Aid was money the Township relied on as a source of revenue.

The State Aid formula has changed. What little money the Township now receives from the State is “NOT” based on the financial health of the Township.

Lack of funds & reserves resulted in following:

- Deferred road & ditch maintenance causes increased costs-example: removal of trees instead of brush
- Deferred mandated federal sign replacement
- Borrowed in 2010 - \$25,000 for operating expenses
Borrowed in 2014 - \$60,000 for Bridge abutment
Borrowed in 2015 - \$40,000 for Dresden overlay
- Line of credit – short term until taxes received
- Deferred Town Hall maintenance results in higher costs-example: foundation/roof/electrical/exterior damage
- Deferred Barnard Ave-failed wingwalls-no guard rail
- Ask creditors to wait for 30 to 60 days
- Deferred zoning enforcement
- Lack of reserve funds results in the Township’s inability to sue an entity in a timely manner for failure to meet a contractual obligation. Loss of revenue.

BUDGET ITEMS DRIVING INCREASES IN LEVY

- Increases in ALL operating costs
- Cyclical changes in revenues & expenditures
- Deferred sign, road, ditch & bridge maintenance
- Deferred maintenance/restoration of two structures
- Funding for Dresden-4-yr crack seal & 12-yr overlay
- Increased costs for fire protection – Township participates in a Joint Powers Agreement for fire protection with Northfield Area Fire & Rescue Service. Operating costs, vehicle acquisition, \$3.5 million facility upgrades shared with Townships & Cities.

QUESTION: How does a Township get from inadequate funding and lack of reserves to solid financial health?

ANSWER: The Town Board did the following:

- Appointed Road Committee—5-year road/bridge plan
- Appointed Budget Committee-5-year budget
- Implemented Committee updates at Board meeting
- Implemented Work Sessions with Budget Committee

BUDGET COMMITTEE: Budget Committee Chairperson Marie Struss, Treasurer Charlene Klemenhagen, Board Liaison Larry Odegard, Deputy Treasurer Jane Dilley, were appointed to begin a budgeting process that moves the Township to solid financial health.

BUDGET COMMITTEE PROCESS

- Analyze in detail types of revenue & expenses
- Determine deficits, patterns, cycles, problems
- Examine data critically
- Create spreadsheets to ensure accuracy
- Categorize revenues & expenses by month
- Determine obligations in the current & future years
- Eliminate deferred maintenance-line of credit-loans
- Determine “reserves” necessary to meet unexpected
- Research neighboring Township budgets
- Prepare a comprehensive budget for next fiscal year
- Forecast a five-year comprehensive budget
- Continue to meet at least quarterly to ensure Township remains on target to financial health

DEDICATION: Budgeting requires hours and hours of reviewing, researching, gathering, calculating, examining, planning, categorizing, forecasting, discussing, problem solving, projecting, proposing, etc.

When asked “why does a Budget Committee member volunteer so much time”?

Anonymous answer: “Volunteering is the ultimate exercise in democracy. You vote in elections once a year, but when you volunteer, you vote every day about the kind of community you want to live in.”

Waterford Township Newsletter - June 2017

Tax Levy

The 2018 Township Comprehensive Budget and the 2018 Tax Levy recommendation from the Budget Committee will be discussed, and voted on at the re-convened Annual Township Meeting on August 14, 2017.

If you are unable to attend the meeting, please call the Township Clerk, a Board Supervisor or a Budget Committee member with any questions, concerns or comments. Contact information is on the last page of this newsletter.

RETRO-REFLECTIVITY REQUIREMENTS

Did you know that 25% of travel occurs in dark conditions or that 50% of crashes happen in dark conditions?

Watch this summer and next summer as the Township uses *your tax dollars* to replace road and street signs to comply with the minimum retro-reflectivity sign requirements mandated by the Federal Highway Administration.

Have a question or concern about a sign in the Township or the lack of a sign in the Township, please call or e-mail the Township Clerk. Contact information is on the last page of the newsletter.

Got a project? Do you need a plan review, a building permit or inspection? **Answer – it depends!!!**

Plan reviews, building permits and inspections may seem like annoying red tape, but they play an important role by keeping you safe, ensuring you are not violating zoning regulations, making your contractor build to code thereby enhancing the value of your home.

Before you embark on a project take a moment to call or e-mail the Township Clerk or the Building Official. Contact information can be found on the last page of this newsletter.

SPOT CHLORIDE APPLICATION

Approximately 40 homeowners paid \$100 each for chloride application in front of their homes either in late May or early June. Blading before chloride determines schedule.

CANADA AVENUE

Due to high traffic volumes, Canada Avenue is scheduled to have curb to curb gravel, blading and chloride between Highway 19 & County Road 47. Scheduled for June 2017.

SCHEDULED CHLORIDE APPLICATIONS

- Retention of Fines – Stops surface deterioration
- Reduces material replacement costs—less gravel
- Less blading necessary – stabilizes road surface.
- Elimination of dust complaints – dust free
- Increased safety – clouds of dust reduce visibility
- Reduces potholes and wash-boarding – smooth ride

Do you know?

Looking for any information someone may have on the old upright piano that is stored in the northwest corner of the Township Hall.

The piano has served as the residence, rent free, for at least a few mice until recently when Election Judge Paul Wrolstad and Treasurer Charlene Klemenhausen evicted them.

If you have any recollection you can share about the history of the piano, please call Charlene at 952-356-5164.

New Commissioner

Andy Devney, “home grown” Waterford resident was appointed to fill the vacancy on the Planning Commission.

Andy also serves on the Road Committee and is currently using his technology skills to build a database of “signs” and “road maintenance.” The completed database will be a valuable planning tool for the Road Committee, the Budget Committee & the Town Board now & for the future.

Andy farms and raises cattle with his Dad. In his spare time, he enjoys hiking and kayaking.

Waterford Township Newsletter - June 2017

2016 AT A GLANCE

TOWNSHIP ACTIVITIES

(Some but not all activities)

Township Treasurer Charlene Klemenhagen is on a mission - **CLEANING THE TOWNSHIP HALL.**

Charlene has volunteered hours and hours of her time cleaning the Township Hall, fixing broken windows, catching lots of mice, removing rodent & wasp nests, cleaning up rodent feces, removing mildew & moldy materials, cleaning floors, sweeping up lots of bug carcasses, trimming trees & bushes, picking up trash, mopping up water, patching floor, disposing of: entry rug, thread bare curtains, old paint, burned out florescent lights, broken furniture, expired chemicals, out of order appliances, sorting through boxes & boxes of papers, etc.

This reporter asked Charlene **“Why do you volunteer so many hours cleaning & performing maintenance?”**

Charlene’s answer: **“so those that come to vote, or attend a meeting or tour the historic building or rent the Township Hall feel the “pride of the community”.**

In March 2017, after watching the appearance of the Township Hall change from month to month and appreciating the cleanliness of the building for meetings, the Town Board decided it was time to allocate a small budget for keeping the building clean. The Town Board requested quotes for cleaning and general maintenance.

In April 2017, Charlene Klemenhagen’s quote was approved by the Town Board. She immediately suggested that cleaning up the “entry or gateway” to the Township Hall would further enhance the appearance of the building while we wait for exterior painting.

In May 2017, the Town Board authorized Charlene to purchase the necessary supplies to clean, patch, and paint the main “entry or gateway” including the water damaged ceiling.

Charlene, the Township residents are the benefactors of “your pride in your community.” Thank you so much!

Desire to have a voice?

The Township is looking for a resident that is interested in Township government, having a voice at the table and reviewing various types of permits for zoning compliance to fill a vacancy on the Planning Commission. No experience necessary – will train.

The Commission meets once a month April through October for approximately an hour and periodically for a Public Hearing. If you are interested, please call the Township Clerk or a Supervisor.

Agendas	13
Annual Road Inspection	1

- Policies: Fees, Speaking at Meetings,
- Applications: Building Permit, Sign, CUP, IUP, etc.
- Contact Info: Board, Commission, Committees
- History – Newsletters – Announcements – etc.

RED ROSE CEMETERY UPDATE

Cemetery Superintendent/Caretaker Dick Ozmun reported there was one burial at Red Rose Cemetery last year. Also, the largest tree in the cemetery was struck by lightning several years ago. It had reached the point that removal was necessary; that was done in March of this year.

Lots, of course, are still available for purchase. Dick can be reached at 507-645-9700 or 952-807-3662.

Donations / memorials are always welcome (and needed for upkeep). Checks can be made payable to "Red Rose Cemetery" and sent to 30555 Canada Avenue, Northfield, MN 55057.

To keep the cemetery looking good, dead flowers/plants should be removed. Please do not put wires/artificial flowers in the ground as these present a danger when mowing/weed whipping.

Please Note: Every effort is made to provide accurate & complete information in this newsletter. Cannot guarantee that there will be no errors. Township Clerk makes no claims, promises or guarantees about the accuracy, completeness, or adequacy of the contents of the newsletters & expressly disclaims liability for errors & omissions in the contents.
